

Syarfandi "Andi" Achmad

DevOps / SRE Engineer | Cloud Infrastructure & Security Specialist Makassar, Indonesia | [+62 852-5652-2335](tel:+6285256522335) | syarfandi.achmad@gmail.com | Portfolio: syarfandi.github.io | [LinkedIn](#)

Professional Summary

Dynamic **DevOps / SRE Engineer** with 4+ years of experience in architecting **high-availability (99.9% uptime)** systems and self-healing infrastructure. Expert at bridging development and security through **Kubernetes** orchestration and **Terraform** automation. Focused on **Observability** and **Toil Reduction**, I help global organizations scale rapidly while maintaining rock-solid system integrity. A proactive leader in **asynchronous remote teams**, dedicated to operational excellence and proactive incident management.

Core Technical Competencies

- Infrastructure & Orchestration:** Kubernetes (K8s), Terraform (IaC), Docker, Helm, AWS/GCP, Linux System Administration.
- Observability & Reliability:** Prometheus, Grafana, SLIs/SLOs/SLAs monitoring, Incident Response, Post-mortem analysis, Error Budgets.
- Security & Compliance:** DevOps (SAST/DAST), Zero Trust Architecture principles, BSSN Incident Response, Serverless Security.
- CI/CD & Automation:** GitHub Actions, GitLab CI, Jenkins, PM2, Python/Bash/Go Scripting (Toil Reduction).
- Data & Middleware:** Supabase, PostgreSQL (Optimization & Scaling), RESTful API Architecture, Redis.
- Soft Skills:** Asynchronous Collaboration, Technical Writing, Remote Team Leadership, Strategic Planning.

Technical Projects

- Kawan Sedarah (Blood Stock):** A **command center** dashboard that tracks **blood stock** availability across donor units in **real-time**, powered by **Supabase** as its core backend.
- Portal Data Sulsel:** A unified information system delivering **data visualization, monitoring**, and religious **statistical analysis** across all districts in South Sulawesi in **real-time**.
- AI Virtual Assistant:** A **Conversational AI**-powered virtual assistant featuring **Realtime Lipsync** on 3D avatars, backed by **Voice AI** and **LLM** for immersive conversational interactions.
- GetKasir Enterprise POS:** A large-scale **Enterprise** POS ecosystem with **100+ modules**, integrating **AI-driven** sales prediction, **biometric** authentication, and a scalable **cloud-native** architecture.
- PPID Kemenag Kota Parepare:** A public information disclosure portal for **PPID Kemenag** providing access to **official documents, performance reports**, and an intelligent chatbot powered by **Google Gemini AI**.
- OP Tracker:** A premium logbook for tracking **One Piece** watch progress without login — equipped with automatic **filler filter, saga & arc** navigation map, and a gamified **pirate rank** system.
- QR Scanner Presence App:** A modern **attendance solution** leveraging **QR Code** scanning for instant participant check-in, built on a **Next.js + Supabase** stack with **real-time** sync.
- Malmora (Reseller & Dropship):** A **reseller & dropship** marketplace tailored for Muslim lifestyle products, enabling anyone to sell without physical stock across **Sulawesi and Eastern Indonesia**.
- Email Server Makassar Gov:** A city-scale **Mailcow**-based email cluster serving **200+ official domains** for Makassar City Government, hardened with **SPF/DKIM/DMARC** security protocols and **high-availability** setup.
- Helpdesk Kota Makassar:** An **e-government** system for handling **citizen complaints** digitally — featuring **real-time ticket tracking**, automated escalation, and cross-department integration across **Makassar City agencies**.
- Virtual Museum Makassar:** An immersive digital museum experience with **360° panoramic** tours, interactive **3D artifact** collections, and **audio-visual** narratives preserving South Sulawesi cultural heritage.
- AI-Haram VR:** A high-precision **virtual reality** simulation of **Al-Masjid Al-Haram** and **Al-Masjid An-Nabawi**, developed in **Unity** and optimized for both **VR headsets** and mobile devices as a Hajj & Umrah educational tool.
- Paralluta (Lalu Lintas):** A smart platform for **traffic management** in Makassar City — covering **road condition monitoring**, violation logging, and centralized **field officer coordination**.
- SOP Pelaporan Insiden Siber:** A **SOP** framework and **cyber incident response protocols** designed for **Makassar City Government** IT infrastructure, aligned with **BSSN** and **NIST Cybersecurity Framework** standards.

Professional Experience

Computer Specialist (Civil Servant) | Ministry of Religious Affairs (Regional Office)

2025 – Present | Makassar, Indonesia

- Spearheaded** the digital transformation of regional religious services, migrating legacy systems to modern cloud architectures.
- Orchestrated** the regional data infrastructure (**Data Sulsel**), enabling real-time statistical analysis for over 9 million residents.
- Strengthened** organizational security posture by implementing automated compliance checks and standardized incident response protocols.
- Automated** internal reporting workflows, reducing manual data processing time by 60% through custom integration scripts.

DevOps & Infrastructure Expert | Department of Communication & Informatics (Diskominfo)

2023 – 2025 | Makassar, Indonesia

- Managed** complex on-prem server environments and infrastructure for over **200+ department domains (Satuan Kerja)** across the city government.
- Engineered** a secure and resilient government email cluster using **Mailcow**, ensuring 99.99% availability and robust anti-spam/security filtering.
- Secured** government digital assets by leading the technical response team during the **BSSN National Cyber Exercise**, maintaining 100% uptime during simulated attacks.

Co-Founder | GetKasir (Enterprise POS Startup)

2019 – Present | Remote/Project-based

- Scaled** the cloud infrastructure for a massive **100+ module enterprise retail ecosystem**.
- Integrated** biometric security protocols and automated identity verification systems into the production environment.
- Optimized** PostgreSQL database clusters and Supabase instances to handle high-concurrency retail transactions during peak periods.
- Standardized** technical documentation for infrastructure scaling and disaster recovery, enabling seamless asynchronous collaboration.

SQA & DevOps Engineer | Malmora (Startup)

2020 – 2023 | Remote

- Automated** full-stack testing frameworks and CI/CD pipelines for a high-scale **Mobile Marketplace Reseller** platform.
- Streamlined** mobile app release cycles, ensuring rapid delivery of features while maintaining rigorous quality standards.
- Orchestrated** cloud staging and production environments, reducing infrastructure costs by 25% through resource optimization and serverless utilization.

Secretary | Nurul Huda Mosque

2021 – 2026 | Makassar, Indonesia

- Managed** organizational administration and coordinated the 2021-2026 board of directors.
- Optimized** community asset management and digital documentation for the mosque's operations.

Certifications & Awards

- National Cyber Exercise #10** – BSSN (2024)
- Top 10 Winner** – Samsung Indonesia Next Apps 4.0 Gear VR Challenge (2017)
- Microsoft CityApp Appathon** – Participant & Developer

Education

- Bachelor of Computer Science (S.Kom)** | UIN Alauddin Makassar *GPA: 3.22 / 4.00*

Future-Ready Technical Roadmap

To stay competitive in the global DevOps & Infrastructure market, I am actively implementing:

- **Zero Trust Architecture:** Identity-aware proxies and 'Never Trust, Always Verify' principles.
- **eBPF Security:** Deep kernel-level observability and real-time security monitoring.
- **GitOps:** Using ArgoCD/Flux for automated and declarative infrastructure synchronization.
- **Chaos Engineering:** Implementing fault injection and resilience testing using Chaos Mesh or Gremlin.
- **Serverless Security:** Securing AWS Lambda/Edge functions and automated IAM least-privilege auditing.
