

Syarfandi "Andi" Achmad

Fullstack Developer | End-to-End Web Application Specialist Makassar, Indonesia | +62 852-5652-2335 | syarfandi.achmad@gmail.com | Portfolio: syarfandi.github.io | LinkedIn

Professional Summary

Versatile **Fullstack Developer** with 4+ years of experience engineering end-to-end digital platforms — from pixel-perfect UIs to high-performance backend APIs. Expert in the **React/Next.js** frontend and **Node.js/PostgreSQL/Supabase** backend ecosystems. Proven track record delivering production-grade applications for government agencies and enterprise startups, handling millions of records with 99.9% uptime. Passionate about clean architecture, responsive design, and shipping features that delight users.

Core Technical Competencies

- Frontend:** React, Next.js (SSR, SSG, RSC), TypeScript, JavaScript (ES6+), Three.js, Framer Motion, Tailwind CSS, Responsive Design.
- Backend:** Node.js, Express.js, Fastify, Next.js API Routes, WebSocket, PM2 Process Management, Background Job Queues.
- Database:** PostgreSQL (Stored Procedures, Indexing, Partitioning), Supabase (Realtime, RLS, Edge Functions), Redis Caching.
- API Design:** RESTful Architecture, GraphQL, WebSocket (Real-time), JWT & OAuth Authentication, Rate Limiting.
- DevOps & Deployment:** Docker, GitHub Actions, Vercel, Nginx, Linux Server Administration, CI/CD Pipelines.
- Soft Skills:** End-to-End Ownership, Technical Documentation, Asynchronous Collaboration, Remote Team Leadership.

Technical Projects (Full-Stack)

- Kawan Sedarah (Blood Stock):** A **command center** dashboard that tracks **blood stock** availability across donor units in **real-time**, powered by **Supabase** as its core backend.
- Portal Data Sulsel:** A unified information system delivering **data visualization, monitoring,** and religious **statistical analysis** across all districts in South Sulawesi in **real-time**.
- AI Virtual Assistant:** A **Conversational AI**-powered virtual assistant featuring **Realtime Lipsync** on 3D avatars, backed by **Voice AI** and **LLM** for immersive conversational interactions.
- GetKasir Enterprise POS:** A large-scale **Enterprise** POS ecosystem with **100+ modules**, integrating **AI**-driven sales prediction, **biometric** authentication, and a scalable **cloud-native** architecture.
- PPID Kemenag Kota Parepare:** A public information disclosure portal for **PPID Kemenag** providing access to **official documents, performance reports,** and an intelligent chatbot powered by **Google Gemini AI**.
- OP Tracker:** A premium logbook for tracking **One Piece** watch progress without login — equipped with automatic **filler filter, saga & arc** navigation map, and a gamified **pirate rank** system.
- QR Scanner Presence App:** A modern **attendance solution** leveraging **QR Code** scanning for instant participant check-in, built on a **Next.js + Supabase** stack with **real-time** sync.
- Malmora (Reseller & Dropship):** A **reseller & dropship** marketplace tailored for Muslim lifestyle products, enabling anyone to sell without physical stock across **Sulawesi and Eastern Indonesia**.
- Email Server Makassar Gov:** A city-scale **Mailcow**-based email cluster serving **200+ official domains** for Makassar City Government, hardened with **SPF/DKIM/DMARC** security protocols and **high-availability** setup.
- Helpdesk Kota Makassar:** An **e-government** system for handling **citizen complaints** digitally — featuring **real-time ticket tracking,** automated escalation, and cross-department integration across **Makassar City agencies**.
- Virtual Museum Makassar:** An immersive digital museum experience with **360° panoramic** tours, interactive **3D artifact** collections, and **audio-visual** narratives preserving South Sulawesi cultural heritage.
- Al-Haram VR:** A high-precision **virtual reality** simulation of **Al-Masjid Al-Haram** and **Al-Masjid An-Nabawi**, developed in **Unity** and optimized for both **VR headsets** and mobile devices as a Hajj & Umrah educational tool.
- Paralluta (Lalu Lintas):** A smart platform for **traffic management** in Makassar City — covering **road condition monitoring,** violation logging, and centralized **field officer coordination**.
- SOP Pelaporan Insiden Siber:** A **SOP** framework and **cyber incident response protocols** designed for **Makassar City Government** IT infrastructure, aligned with **BSSN** and **NIST Cybersecurity Framework** standards.

Professional Experience

Computer Specialist (Civil Servant) | Ministry of Religious Affairs (Regional Office)

2025 – Present | Makassar, Indonesia

- Led** end-to-end development of **Data Sulsel** — React analytics dashboard frontend + Node.js/Supabase backend serving 9M+ records with real-time data visualization.
- Built** responsive admin panels with complex form state management, PostgreSQL stored procedures, and RESTful APIs for multi-tenant government services.
- Automated** CI/CD pipelines with GitHub Actions, reducing deployment time from hours to minutes across staging and production environments.
- Implemented** JWT-based authentication, row-level security (RLS), and automated database migrations for secure multi-tenant architectures.

DevOps & Infrastructure Expert | Department of Communication & Informatics (Diskominfo)

2023 – 2025 | Makassar, Indonesia

- Developed** the **Helpdesk Makassar** citizen portal end-to-end — responsive React UI, ticket lifecycle management API, and cross-department routing backend.
- Built** admin dashboards and automated provisioning scripts for **Mailcow** email cluster serving 200+ government domains with monitoring and alerting.
- Engineered** the **Virtual Museum Makassar** — 360° panoramic React frontend with interactive 3D asset loading and backend content management API.

Co-Founder | GetKasir (Enterprise POS Startup)

2019 – Present | Remote/Project-based

- Designed** and built a **100+ module enterprise POS ecosystem** end-to-end — React merchant dashboard + Node.js/PostgreSQL backend handling thousands of daily transactions.
- Implemented** real-time inventory synchronization, sales analytics dashboards, and Supabase Realtime subscriptions for live merchant updates.
- Optimized** full-stack performance: React code-splitting and lazy loading on frontend, SQL query tuning and Redis caching on backend — 40% faster response times.
- Built** multi-branch data sync, webhook integrations, and background job queues (Bull/Redis) for automated merchant workflows.

SQA & DevOps Engineer | Malmora (Startup)

2020 – 2023 | Remote

- Built** full-stack e-commerce platform for reseller & dropship — React storefront + Node.js order processing backend serving Sulawesi and Eastern Indonesia.
- Implemented** product catalog UI components, shopping cart state management, and backend APIs for inventory synchronization and courier integration.
- Designed** database schemas for multi-vendor product catalogs, user role management, commission tracking, and automated order fulfillment pipelines.
- Automated** end-to-end testing and CI/CD pipelines, reducing deployment failures by 35% and accelerating feature delivery.

Secretary | Nurul Huda Mosque

2021 – 2026 | Makassar, Indonesia

- Managed** organizational administration and coordinated the 2021-2026 board of directors.
- Digitized** community asset management through custom full-stack solutions and automated reporting dashboards.

Certifications & Awards

- National Cyber Exercise #10** – BSSN (2024)
- Top 10 Winner** – Samsung Indonesia Next Apps 4.0 Gear VR Challenge (2017)
- Microsoft CityApp Appathon** – Participant & Developer

Education

- Bachelor of Computer Science (S.Kom)** | UIN Alauddin Makassar GPA: 3.22 / 4.00

Fullstack Expertise Keywords

Future-Ready Technical Roadmap

To stay competitive in the global Backend market, I am actively implementing:

- Distributed Systems:** Designing highly-available, event-driven architectures with Kafka and RabbitMQ.
- AI-Driven APIs:** Integrating AI models directly into backend pipelines for real-time intelligence.
- Vector Databases:** Implementing Pinecone/Milvus for efficient AI similarity searches and RAG systems.
- Edge Databases:** Utilizing distributed databases like Turso/Supabase Edge for low-latency global data access.
